SUMMARY

Computer Engineering graduate with hands-on experience in building full-stack web applications using React, Node.js, and Express. Skilled in API integration, data processing, and database design (SQL/NoSQL). Completed a Fullstack Bootcamp focusing on React, Redux, and backend technologies. Currently developing the frontend of an e-commerce platform using React, Redux Toolkit, and TailwindCSS, with API integration for dynamic data rendering. Developed projects involving RESTful APIs, authentication, and responsive web design. Passionate about learning new technologies, adapting quickly, and delivering scalable, user-friendly solutions for e-commerce and data-driven platforms.

WORK EXPERIENCE

SSID Global Ltd. Şti.

June 2022 -August 2022

Software Engineer Intern

- During the learning process, I gained practical experience by learning and implementing the Python Flask library to complete assigned tasks. Additionally, I developed small projects using Arduino along with various sensors, emphasizing continuous learning and experimentation. This period was primarily focused on enhancing my understanding of Python Flask and developing my skills in creating innovative projects through hardware interfacing with Arduino and different sensors.

SKILLS

- Frontend :** HTML5 | CSS | JavaScript | TypeScript | React | Redux | SASS | Bootstrap | Material UI | Figma | Axios | Yup | Formik | Tailwind CSS | Responsive Web Design | JSX | UX/UI | Pixel-perfect | 3D | R3F
- Backend :** Node.js | Express | Python | Linux | OOP | RESTful APIs | CRUD | Authentication | Authorization | Validation | Solid | Nestjs | Kafka | Mikroservice
- Databases :** SQL | PostgreSQL | MongoDB | Redis
- Other :** Git | GitHub | APIs | Agile | Webpack | Docker

Soft Skills :

Project Management | Problem-Solving | Strong Communication | Time Management | Adaptability | Continuous Learning | Collaboration & Teamwork | Resilience | Creativity | Self-motivated | Independent | Organized | Proactive | Creative

PROJECTS

- StockApp** it is a Single Page Application where the user can manage stocks, brands, purchases, and sales, as well as add new entries or edit existing ones. Validation processes are implemented using Yup and the Formik library, while styling is done with **Tailwind CSS**. State management is handled through Redux Toolkit. The backend is developed with **Express.js** and handles **RESTful APIs** for CRUD operations, user authentication, and interaction with a MongoDB database.
- E-commerce Backend Project** – Built a **microservice-based** backend with **NestJS**, where services communicate via TCP. Products are cached using **Redis** for fast access. When an order is created, an event is published via Kafka to notify related services. **MongoDB** and **PostgreSQL** are used for data storage. The entire system runs in **Docker** containers.

EDUCATION

- Sakarya University,Sakarya
Computer Engineering, 2017 - 2022
- Gelenbevi High School,Istanbul 2012 - 2016

CERTIFICATIONS

- Clarusway Fullstack Developer Course Certificate February , 2024
- Global Ai Hub Introduction To Python March , 2023
- Beginner Frontend Web Development Path December , 2022
